There has been value of our farms and their product is secnothing in the public history of the bank since that date to cause any uneasiness to the stockholders. The suicide of President Runyon, while strengthening the testimony of giant frauds in the management, causes unbounded astonishment to the general public.

Value of our farms and their product is second only among the states. There is a firmness and reliability in agricultural pursuits which are not always found in other branches of industry and human efforts. The soil remains in its place ready to be tilled, and the farmer, with ruddy health and brawny arms, depends alone upon the work of his hands and the aid of kind providence for the reward of his labor.
